LeetCode

Portfolio

EDUCATION

Kalinga Institute of Industrial Technology (KIIT)

B.Tech in Computer Science

2022 – 2026

CGPA: 8.5

Parvati Radhakishen Fomra School, Mathura

Class XII: 79.8% (2022) — Class X: 90% (2020)

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, TypeScript

Backend & APIs: Spring Boot, Spring Cloud, Spring Security, REST APIs, GraphQL, FastAPI, Node.js, JWT, OAuth2

AI & LLM: RAG, LangChain, OpenAI API, Sentence Transformers, Vector Search, Prompt Engineering, Pinecone

Databases & Messaging: PostgreSQL, MongoDB, MySQL, Redis, Apache Kafka

Cloud & DevOps: AWS (EC2, S3, VPC, IAM), Docker, Kubernetes, Terraform, GitHub Actions, Linux

Core Concepts: Microservices, Event-Driven Architecture, Distributed Systems, System Design, DSA, OOP, TCP/IP

Testing: JUnit, Mockito, Integration Testing, Postman

PROFESSIONAL EXPERIENCE

Software Developer

Jan 2026 – Present

Mindclick Consulting

- Developed and maintained a full-stack e-learning marketplace platform supporting course discovery, enrollment, content delivery, and user management workflows.
- Designed and implemented scalable REST APIs, authentication systems, and backend services using modern web technologies to support secure and reliable platform operations.
- Delivered 10+ product enhancements and bug fixes by collaborating with clients, stakeholders, and cross-functional teams to translate business requirements into technical solutions.
- Built production-ready features using React, TypeScript, Node.js, SQL databases, Git, and cloud deployment workflows within an Agile development environment.
- Led feature development, testing, deployment, and production support activities while contributing to sprint planning, delivery tracking, risk management, and release coordination.
- Supported client demonstrations, solution documentation, technical presentations, and requirement analysis, gaining hands-on experience across the complete Software Development Life Cycle (SDLC).

PROJECTS

Dhwani | *AI-Powered Hindi Voice Assistant for Government Welfare Schemes* | [GitHub](#) | [Live](#)

2026

- Built an offline AI-powered Hindi voice assistant enabling citizens to discover, understand, and access information on 2,000+ Indian government welfare schemes through natural voice and text interactions.
- Designed a Retrieval-Augmented Generation (RAG) pipeline using FastAPI, Sentence Transformers, MiniLM embeddings, vector similarity search, Param-1 2.9B LLM, and Indic Parler-TTS for context-aware voice-based assistance.
- Improved accessibility for regional-language users by providing offline eligibility checks, benefit explanations, document requirements, and application guidance without relying on external APIs.

FinTrack | *Distributed Financial Microservices Suite* | [GitHub](#) | [Live](#)

2025

- Built a distributed fintech platform comprising 6 microservices for authentication, account management, analytics, notifications, API gateway, and service discovery.
- Implemented a cloud-native microservices architecture using Java, Spring Cloud, Eureka, Spring Cloud Config, OAuth2, Feign Clients, MongoDB, circuit breakers, and Docker Compose.
- Enhanced scalability, security, and fault tolerance while reducing environment setup time from approximately 20 minutes to under 1 minute through containerized multi-service deployment and centralized configuration management.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Academy Cloud Architecting (2025)** – EC2, S3, VPC, IAM, Scalable Cloud Architecture
- Android App Development (2024)** – Cognizance'24, IIT Roorkee (Kotlin, MVVM, Firebase)
- Competitive Programming** – Top 30% globally on LeetCode; solved 100+ algorithmic problems in C++
- Open Source** – Maintained 5+ GitHub repositories with CI/CD workflows and 50+ cumulative stars
