LeetCode

Portfolio

EDUCATION

Kalinga Institute of Industrial Technology (KIIT)

B.Tech in Computer Science

2022 – 2026

CGPA: 8.5

Parvati Radhakishen Fomra School, Mathura

Class XII: 79.8% (2022) — Class X: 90% (2020)

TECHNICAL SKILLS

Languages: Java, C++, Python, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring Cloud, REST APIs, GraphQL, JWT, OAuth2, WebSockets, Node.js, Express.js

Databases: PostgreSQL, MongoDB, MySQL, MyBatis, Prisma ORM, Firebase

Cloud & DevOps: AWS (EC2, S3, VPC), Docker, Docker Compose, GitHub Actions CI/CD, Git, Linux

Patterns: Microservices, DDD, CQRS, Service Discovery, Circuit Breaker, Clean Architecture

Systems: DSA, OOP, C++20, TCP/IP, Performance Engineering, Memory Optimisation

PROJECTS

Dhwani | *AI-Powered Hindi Voice Assistant for Government Welfare Schemes* | [GitHub](#) | [Live](#)

2026

- Python, FastAPI, React, Vite, Tailwind CSS, Param-1 LLM, Indic Parler-TTS, Sentence Transformers, Docker
- Built an offline AI voice assistant that helps citizens discover 2,000+ Indian government welfare schemes through Hindi voice and text conversations.
- Designed a retrieval-augmented pipeline using MiniLM embeddings and cosine similarity search to fetch relevant scheme context before generating eligibility, benefit, and application guidance.
- Integrated Param-1 2.9B LLM inference with streaming responses and sentence-level Indic TTS playback, enabling voice-in/voice-out user interaction without external APIs.
- Developed FastAPI backend with React frontend and Docker-based deployment flow; structured separate services for retrieval, LLM inference, TTS routing, and scheme data processing.

FinTrack | *Distributed Financial Microservices Suite* | [GitHub](#) | [Live](#)

2025

- Java, Spring Cloud, Eureka, Zuul Gateway, OAuth2, MongoDB, Docker Compose, Hystrix, Feign
- Built a 6-service distributed fintech platform (Auth, Account, Statistics, Notification, Gateway, Registry) using Spring Cloud with Netflix Eureka and Ribbon for client-side load balancing.
- Implemented OAuth2-based M2M and user-to-service auth via a dedicated Auth Service; integrated Hystrix circuit breakers reducing failure blast radius by 90% during downstream outages.
- Engineered real-time cash flow analytics in the Statistics Service across 6 services; configured Spring Cloud Config for centralised, environment-aware configuration management.
- Orchestrated full multi-service deployment via Docker Compose with dev and production profiles, reducing environment spin-up from ~20 minutes to under 60 seconds.

POSITIONS OF RESPONSIBILITY

Founding Engineer

Jan 2026 – Mar 2026

Corporate Cruise

- Architected scalable RESTful backend and 10+ database schemas from scratch; led end-to-end development from idea to deployed MVP within 8 weeks, shipping 3 major feature releases on schedule.
- Coordinated CI/CD pipelines and frontend integration to ship a production-ready platform serving 50+ users with zero critical post-launch bugs.

Administration Team Member

Jan 2023 – Jan 2024

IoT Lab

- Managed lab operations for 30+ members across 10+ active projects; mentored 8+ juniors on hardware-software integration, reducing onboarding time by ~30%.

CERTIFICATIONS

AWS Academy Cloud Architecting

2025

Amazon Web Services — EC2, S3, VPC, IAM, scalable architecture

Android App Development

2024

Cognizance'24, IIT Roorkee (Teachnook) — Kotlin, MVVM, Firebase

ACHIEVEMENTS & EXTRA-CURRICULARS

Competitive Programming: Solved 100+ LeetCode problems in C++ (arrays, graphs, DP, system-level algorithms); ranked in top 30% globally on LeetCode contest leaderboard.

Open Source: Contributed to 5+ backend/systems repos on GitHub; maintained projects with full documentation and CI workflows, accumulating 50+ GitHub stars across personal repositories.
